Memories

Transition ① Idea

Web Exploit

① Name, Birthday

Transition ② Idea

XSS

②

Parents, Childhood memories,
degrees

↳ watch grades etc.

↳ graduate with summa cum laude

Transition ③ Idea

XSS

③

Becoming a successful computer scientists,
hacker

Transition ④ Idea

Crypto

④

Writing the algorithm, compression algorithms
- 2: compressing and decompressing kinda
everything very efficiently

Transition ⑤ Idea

Crypto

⑤

Meeting Antagonist for first time
Talk about algorithm, has an interesting
offer

Transition ⑥ Idea

XSS

⑥

Escalation: You don't want to give
the algorithms to Antagonist because
of ethical reasons; Realization of
algorithms consequences
example of stuxnet

Transition ⑦ Idea

Crypto

⑦

Threats by Antagonist, the new flat for
safety, you need time
to change the algorithms to avoid harm
Hiding copy of algorithm

Transition ⑧ Idea

Forensics

⑧

Partner, laughter, some beautiful
memories (falling in love)

Transition ⑨ Idea

Forensic

⑨

Showdown: Antagonist got partner
in exchange for the code he frees partner
you in.

Transition (10) Idea (10) Reverse
You came into the hideout or so with the USB Flash drive that contains the algorithm.
You hand it over and they test it. "Take it till you make it".
You got partner and want to leave because the algorithm seems to work... busted

Transition (11) Idea (11) XSS
Escape and how you got amnesia

Transition (1) Waking up, lying in a nosering room, new people, introduction them and their headquarters, trying to remember anything, end up in library, searching for anything that could help to remember, try catching up about missed years (news) Web Exploit

Transition (2) Days later, you try your luck in the lib again. In the bookshelves you found interesting yearbooks from an university. One differs from the others and is a lot thinner. It's a yearbook of the CS students. You look through the pictures as you find yourself starring at one. It's a man, young and smiling. He looks familiar. You change your sitting position as something falls out of the book. A CD. You → PC, open CD. XSS

Transition (3) You begged them to drive to this university. Rob explains to you, that he understands, but as long as they don't know what really happened, it is too dangerous. Josi, who quietly listens to the discussion while reading her book, stands up and walks to them. "You may be right about the dangers, but it is also important to help where we can. Otherwise player will probably never be able to gain back his memories when he is locked up at headquarters". Josi wins discussion. You and the others are driving to the university. Go to the faculty of CS. There are lot of Auszeichnungen at the wall. One contains your name. Best results in a XSS

lot at hachathrons.

- Uni is empty because of semester vacations
- Luckily secretariat is open. With good timing you get to her pc

Transition (4)

Leaving faculty, you remember a Folge von Zeichen:
——. Du kannst erstmal nichts damit anfangen. → Notieren

Crypto

- Erstmal zurück
- Recherche im Netz nach dir selbst. ^{↳ sicheren Lande}
- Paar Ergebnisse über Hachathrons, nichts weiterwegendes
- Schlafen
- Nächster Tag, waktis into Scholoklass - Experiment,
- — zeigt ihm dann die Folge
- Erstmal keine Idee, aber dann.
- IP-Adresse, besucht sie und kommt auf Seite

Transition (5)

- Weißt also von dem Alg.
- Behältst es auf Nachfrage für dich
- Recherche über bisherige Algorithmen
- Es wird klar, warum ist wie dein Alg.
- Ist das der Grund für alles?
- Recherche im Darknet ergibt, dass ^{fr}Gerichte nach Plogers Alg gibt mehr Infos in Datei
- Eine Beschreibung zu jmd der mehr wissen könnte

Transition (6)

- Nachm Flashback ist dir ^{nicht} ~~mal~~ gut, Bauchgefühl
- Wochen vergehen mit mehr Recherche, bonding with new friends
- Hilfst denen überall
- Abends, Film, Bedrohung
- Traum → CTF

Transition (7)

- Bedeutung des Algs. wird dir klar
- Wo könnte der Alg zu finden sein?
- Was ist danach (Traum) passiert?
- Erstmal verarbeiten
- Duschen, Gedächtnis bzw Gedankenlesen entschließen

Transition (8)

- Wohnung finden, Nähe von Uni, Details ^{aus} ~~aus~~ Gedächtnis
- Bekannt es mit der Angst zu tun
- Plan mitteilen, erzählst den anderen, was du weißt
- Plan entwerfen, Wohnung aushändig machen
- Auf den Weg machen
- Wohnung betreten → leicht, zu leicht
- Inspektieren alles

• Bild

Transition (9) • Du löst einen Alarm aus, ihr müsst unverzüglich weg
(? Verfolgungsszene + erfolgreich fliehen
• Konntest gerade noch die Kiste mit USB-Sticks greifen

Transition (10)

Tiding up/repairing the USB flash drive that you found in your flat
